

# Ying Cao

Phone: (+86) 136-4553-5413

Email: [bnu\\_caoying@qq.com](mailto:bnu_caoying@qq.com)

Target Role: Strategy Consulting

## EDUCATION

Beijing Normal University

Master of Applied Statistics, School of Statistics

Zhuhai, China

Sep. 2025 – Jun. 2027

- **Coursework & Research:** Multivariate Stat Analysis, Machine Learning; Focus on Causal ML in Education.

Anhui University

Bachelor of Mathematics and Applied Mathematics

Hefei, China

Sep. 2021 – Jun. 2025

- **Honors:** Outstanding Student Leader, Social Practice Advanced Individual, 100m Champion & 1500m Runner-up.

## PROFESSIONAL SKILLS

- **Data Analytics & ML:** Proficient in **Python/R** for end-to-end data processing. Skilled in regression, multi-variate analysis, and optimizing models (Random Forest, LightGBM) to drive data-informed decision-making.
- **Business Acumen:** CET-6 (560). Strong capability in structuring analytical reports and effectively bridging technical algorithms with business strategies and product deployment.

## PROFESSIONAL EXPERIENCE

Bytedance Technology Co., Ltd.

AI Vertical Intern, SFT - Team

Beijing, China

Dec. 2023 – Mar. 2024

- Spearheaded the mathematical Q&A system iteration via Supervised Fine-Tuning (SFT); diagnosed reasoning gaps and designed domain-specific datasets to boost model response accuracy by **18%**.
- Established multi-dimensional evaluation metrics to analyze user feedback; collaborated cross-functionally across 3 updates to drive the model's successful deployment in education scenarios.

Guotai Junan Securities Co., Ltd.

Industry Research Intern, Computer Team

Shanghai, China

Mar. 2023 – Aug. 2023

- Mapped the AI value chain (compute, apps, tech) and conducted rigorous financial data analysis to co-author multiple reports.
- Independently authored an AI research framework and a popular science manual, significantly improving internal research efficiency.

## PROJECT EXPERIENCE

National College Student Innovation Competition (National-Level Award)

Project Leader

- Developed a localized digital literacy evaluation framework tailored to Chinese farmers within the agricultural digitalization context.
- Led data integration and modeled capability metrics via Multiple Linear Regression and Mediation Effect models.
- Calibrated models using primary field survey data, substantially enhancing the framework's real-world explanatory power.

Bank Marketing Data Mining & Customer Conversion Prediction

- Processed UCI telemarketing dataset via **R** for anomaly detection and exploratory data visualization.
- Engineered a Random Forest classifier utilizing Grid Search to achieve a 90% client subscription prediction accuracy.
- Conducted **SHAP** value analysis to interpret outputs, delivering actionable insights for the bank's sales strategies.

## ADDITIONAL INFORMATION

- **Content Creation:** Managed Xiaohongshu and WeChat accounts focusing on mathematics and statistics, achieving **800k+** views and **31k+** engagements. Demonstrated strong information structuring skills by translating complex academic concepts into accessible content.
- **Professional Profile:** Rigorous quantitative background with a proven ability to solve complex business problems from a data perspective. Highly adaptable, communicative, and committed to leveraging technical skills in strategic consulting roles.
